

SurePassExams

- ✓ Online Tool, Convenient, easy to study.
- ✓ Instant Online Access
- ✓ Supports All Web Browsers
- ✓ Practice Online Anytime
- ✓ Test History and Performance Review
- ✓ Supports Windows / Mac / Android / iOS, etc.

- ✓ Installable Software Application
- ✓ Simulates Real Exam Environment
- ✓ Builds Exam Confidence
- ✓ Supports MS Operating System
- ✓ Two Modes For Practice
- ✓ Practice Offline Anytime

- ✓ Printable PDF Format
- ✓ Prepared by IT Experts
- ✓ Instant Access to Download
- ✓ Study Anywhere, Anytime
- ✓ 365 Days Free Updates
- ✓ Free PDF Demo Available

Security & Privacy

We respect customer privacy. We use McAfee's security service to provide you with utmost security for your personal information & peace of mind.

365 Days Free Updates

Free update is available within 365 days after your purchase. After 365 days, you will get 50% discounts for updating.

Money Back Guarantee

Full refund if you fail the corresponding exam in 90 days after purchasing. And Free get any another product.

Instant Download

After Payment, our system will send you the products you purchase in mailbox in a minute after payment. If not received within 2 hours, please contact us.

Legal & authoritative company offering the highest pass-rate Exam Torrent materials and helping use pass for sure.

Exam : ISS-001

Title : Intel Server Specialist Certification Exam

Vendors : CompTIA

Version : DEMO

NO.1 A customer is designing a security appliance, and has asked an Intel Server Specialist to supply them

with a 1-socket rack mount server with as many Gigabit Ethernet ports as possible.

Which of the following configurations would be the MOST appropriate to recommend?

A. Intel Server System SR1695GPRX, with Intel Quad Port Gigabit I/O module, and an Intel Gigabit

ET2 Server Adapter.

B. Intel Server System SR1630GP, with an Intel Quad Port Gigabit I/O module.

C. Intel Modular Server System, with additional Gigabit Ethernet mezzanine cards.

D. Intel Server System SR1625UR, with Intel Quad Port Gigabit I/O module, and an Intel PRO/1000

PT Server Adapter.

Answer: A

NO.2 On an Intel Server Board S5520HC, which of the following is the MAXIMUM possible memory speed

that can be reached when the system is configured with 12 DIMMs and 2 Intel Xeon Processors

X5560?

A. 800 MHz

B. 1066 MHz

C. 1333 MHz

D. 1600 MHz

Answer: B

NO.3 Which of the following items are features of IPMI, implemented on Intel Server Boards? (Select THREE).

A. Built-in web server

B. Monitoring of fan speeds

C. Increased processor speed

D. System event log

E. Remote alerting via PET traps

F. Remote keyboard ,video, mouse, and media redirection

Answer: B,D,E

NO.4 Below is a step in the server management configuration process. Which of the following is true about

this command.?

A. This SYSCFG command, Reset Factory Settings, can be used to erase all BMC management settings.

This command can be used to reset the management settings to support reconfiguration of management, without carrying over previous management settings.

B. This SYSCFG command, Refreshes Sensors, resets the sensor values and forces the BMC to rescan all sensors to update the Sensor Data Records (SDR). This is used when a system error has been resolved, but the status remains critical in the SDR.

C. This SYSCFG command, Restore File System, is used to restore a backup of the server management settings. This is an efficient method of restoring the BMC settings if they have been lost or deleted.

D. This DOS command allows a super user to replace the file system within the BMC, reformatting the data area down to a low-level format prior to a system restore.

Answer: A

NO.5 Most Intel servers support memory reliability features like ECC memory, memory scrubbing, mirroring, and sparing. Which of the following features gives the HIGHEST level of memory reliability?

- A. Spare channel mode
- B. Mirrored channel mode
- C. ECC memory
- D. Patrol read/scrubbing

Answer: B

NO.6 The Intel Server Board S5520UR has two different headers through which front panel signals can be routed. Which of the following documents would a server technician use to identify the pinout of each header?

- A. The Technical Product Specification
- B. The Service Guide
- C. The Quick Start Guide
- D. The Spare Parts and Configuration Guide

Answer: A

NO.7 Which of the following RAID levels should an Intel Server Specialist recommend to a customer who must have the highest reliability available, but only has room for four hard drives?

- A. RAID 1
- B. RAID 5
- C. RAID 6
- D. RAID 10

Answer: C

NO.8 Which of the following RAID levels should an Intel Server Specialist recommend to a customer who needs the highest write performance, but only has room for four hard drives?

- A. RAID 1
- B. RAID 5
- C. RAID 6
- D. RAID 10

Answer: D

NO.9 Which of the following is MOST likely to cause a stop error on a 5520 Chipset based Server Board?

- A. CMOS checksum error
- B. PCI bus error
- C. Single drive failure in a RAID 1 set
- D. Memory ECC single bit error

Answer: B

NO.10 On an Intel Server Board S5520HC, which of the following is the MAXIMUM possible memory speed

that can be reached when the system is configured with 12 DIMMs and 2 Intel Xeon Processors X5650?

- A. 800 MHz
- B. 1066 MHz
- C. 1333MHz
- D. 1600 MHz

Answer: C

NO.11 A customer calls and says that a server has suffered a stop error, and intermittently fails to boot. Which

of the following is the preferred FIRST step to take?

- A. Connect to the SEL via the DPC CLI.
- B. Ask the customer to return the server.
- C. Ask the customer to reseat the memory.
- D. Start a remote desktop session to the server.
- E. Connect to the remote management module if present.

Answer: E

NO.12 Which of the following chassis are compatible with the Intel Server Board S5520UR? (Select TWO).

- A. Intel Server Chassis SR1600
- B. Intel Server Chassis SR1625
- C. Intel Server Chassis SR1630
- D. Intel Server Chassis SR1640
- E. Intel Server Chassis SR1695

Answer: A,B

NO.13 An Intel Server Board is integrated into an Intel Server Chassis and uses the latest system update package to bring the BIOS and firmware to the most up-to-date versions. After this process, an Intel

Server Specialist finds that the system fans still spin at full speed, even when the system is idle. Which of

the following is the MOST likely cause of this?

- A. The memory DIMMs in the system do not have a thermal sensor.
- B. The processor has reached the thermal throttling point.
- C. One of the system fans is connected to the wrong header.
- D. The chassis intrusion switch is malfunctioning.

Answer: C

NO.14 Why is it important to update the FRU when first building a system?

- A. Updating the FRU enables the server administrator to remotely access the server.
- B. Updating the FRU allows the server to configure the fan speed correctly.
- C. Updating the FRU allows for the relevant part numbers to be programmed into NVRAM.
- D. Updating the FRU makes sure the Management Engine is running the most recent

firmware.

Answer: C

NO.15 Which of the following documents and tools would a technician use to help determine the correct parts

necessary to build an Intel server? (Select TWO).

- A. Quick Start Guide
- B. Configuration Guide
- C. Intel Server Configurator Tool (SCT)
- D. Product Change Notification (PCN)
- E. Technical Product Specification (TPS)

Answer: B,C

NO.16 The Intel Server Board S5520UR has two different headers through which front panel signals can be

routed. Which of the following documents would a technician use to identify the headers used in a

particular chassis?

- A. The Quick Start Guide
- B. The Service Guide
- C. The Technical Product Specification
- D. The Spare Parts and Configuration Guide

Answer: B

NO.17 Which of the following items are stored in the SDR s? (Select TWO).

- A. BMC remote access settings
- B. Part number information
- C. BMC Operational Code
- D. Fan speed control settings
- E. Voltage sensor thresholds

Answer: D,E

NO.18 A customer has asked an Intel Server Specialist to provide them with a 1U, 2-socket server. The

customer has concerns about power consumption.

Which of the following configurations would offer the MOST energy efficient solution?

- A. Intel Server System SR1695WB
- B. Intel Server System SR1630HGP

- C. Intel Server System SR1600URLX
- D. Intel Server System SR2625URBRP

Answer: A

NO.19 When the server operating system is indicating a generic hardware problem, which of the following is

the BEST place to check for more information on what the root cause of the issue could be?

- A. The EFI shell
- B. The system BIOS
- C. The operating system event log
- D. The SEL

Answer: D

NO.20 When updating the HSC firmware, where is the flash chip that the new firmware is written to?

- A. On the backplane
- B. On the power distribution board
- C. On the remote management module
- D. On the mainboard

Answer: A
